

The Cloud Design is the world's first way to share the explicit knowledge of the cloud computing adoption.

## 6 states of the cloud design

1. DEFINED : Describing the detail of cloud computing usage.
2. VISUALIZED : Expressing the meaning of design as a human-readable way.
3. STORED : Stacking the design as a knowledge asset.
4. EVALUATED : Expressing the value of design.
5. REWARDED : Empowering designers by the incentive.
6. REUSED : Expanding reproduction of the design.

# Eco system enabling the 6 states.
